

Curiosity Programme

Here at Menphys Nursery we run the Curiosity Programme based on a learning approach created by Speech and Language Therapist Gina Davies.

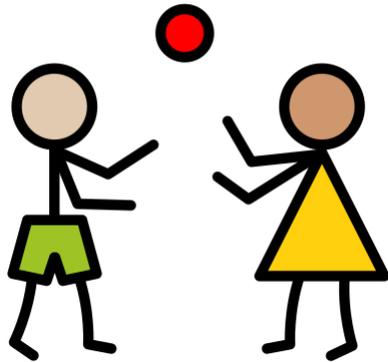

Aims of the Programme

The curiosity programme is all about getting connected and encouraging children to be spontaneously interested in the world around them, including other people.

4 Elements

- Getting connected
- Signature Songs
- Creating Curiosity
- Playing Together

The Curiosity Programme aims to create the best environment to nurture and encourage social communication and social interaction. This is a 1:1 session which is individualised and includes all four elements in each session using the child's interests, movements and sounds.
