

Summer Term 2026

This term we will be exploring and learning about...

Books and texts based on the themes of traditional tales, dinosaurs and the natural world / environment.

We will be exploring mathematical concepts through hands on experience covering, length, capacity and number.

During our imaginative play we will experience a variety of role play and small world play to explore Goldilocks and the three bears, opticians and Happy Land.

During our sensory play this term will be focusing on dry textures, wooden objects and mouldable textures.

We will be developing our fine motor skills through squeezing and scissor skills, mark making with a variety of writing tools and inset jigsaws and puzzles.

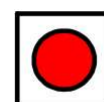

While we are outside we will be exploring gardening and growing, water exploration and throwing and rolling.

Over the term we will be celebrating Father's day, pride month as well as international day of friendship.

In Personal Social and Emotional Development (PSED) our focus will be on understanding our emotions, playing with others and other people's feelings.

At home you might like to explore mark making with water outside on a sunny day. Filling and emptying containers using different materials or maybe you could involve your child in planting some summer plants in a pot or the garden.
